Diamond Tools

OX has been innovating diamond tools for over 23 years and is now clearly recognized as one of the leading brands of choice and at the forefront of technology.

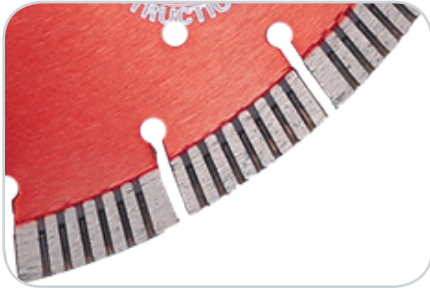

With our 23 years of experience as well as our product and market innovation, we deliver ingenious design solutions to meet ever-evolving customer requirements.

Our first class award winning diamond tools are produced in some of the world's most technically advanced laboratories and factories, guaranteeing the highest manufacturing quality.

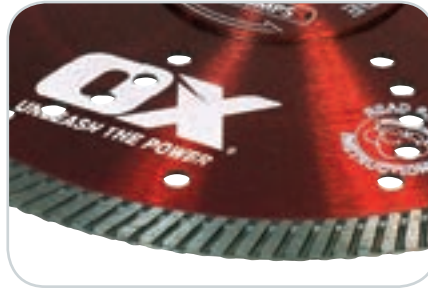

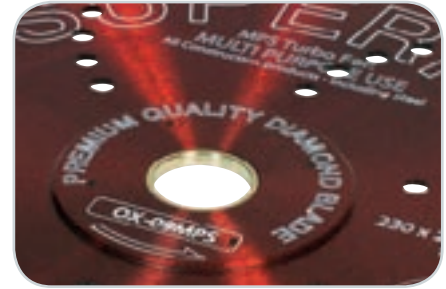

World leading technology

Only the finest quality of diamond is used in the production of OX blades.

State of the art laser technology for ultimate performance and safety.

Blade & cores are made of the highest quality steel, precision engineered, ground and hardened.

Product guarantees & safety

The concept of safety is fundamental to the philosophy of the OX range. It is interwoven into the very fibre of innovation, design and production from concept to after sales service.

EN13236
All blades conform with EN13236 and have this engraved onto the reverse of the product

Full 'No Hassle' Guarantee
Covers all OX products

Diamond Innovation
Ongoing development provides increased performance on existing products, and innovative new diamond solutions.

Safety Instructions
Products undergo rigorous safety and vibration testing at our research & development facility, and in the field.

Hand/Arm Vibration
OX products were among the first to be tested and certified safe for hand/arm vibration.

Extra Safe
Our safety policy is an integral part of our company ethos with policies incorporating ISO18001.

Environmental
Showing that we care: Manufacturing operations accredited to ISO 14001 environmental systems.

We have a responsibility. Quality control systems and environmental and safety management ensure that our care covers not only our products and our customers – but that our ethical guidelines address issues such as staff safety and care for the environment.

TRADE TA10 ASPHALT

Asphalt blade with 10mm segment height and wedge undercut protection. Applications include: asphalt and extremely abrasive materials, render.

Product code	Barcode	Diameter (in)	Bore (mm)	RPM	Inner Qty	Outer Qty
OX-TA10-14	9341231002311	14	25.4/20	5400	5	10

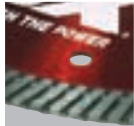

Angle Grinders & Demolition Saws

The blade that is...

GUARANTEED

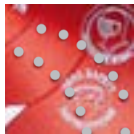

To cut ALL masonry construction products!

SUPERFAST TURBO segment technology combines aggressive cutting ability with a fine, clean cut and no burning of the segments. Eliminating the possibility of single segment detachment.

REINFORCED, EXTRA SECURE, DUAL CENTRE FLANGE AND UNIQUE COOL-FAST DESIGN for a quieter, cooler and safer blade, with no distortion in the cut.

In use, the blade is semi-transparent and cuts out much of the vibration associated with conventional diamond tools.

Safety and vibration tested to meet and surpass relevant standards. Conforms with EN13236.

CUTS EVERYTHING ON A CONSTRUCTION SITE!

PRO MPS UNIVERSAL/HARD

Guaranteed to cut all masonry construction products including metal. Excellent fast cut on universal & hard materials. Reinforced flange. Cooling holes. Semi-transparent. Applications include: granite, natural stone, clay products, engineering bricks, metal, concrete products, all building materials. Wear will increase on abrasive materials. 12mm segment height.

Product code	Barcode	Diameter (in)	Bore (mm)	RPM	Inner Qty	Outer Qty
OX-04MPS	9341231002335	4	16	14500	6	24

Bricksaw & Blocksaw Blades

TRADE THB HARD BRICK

The hard brick blade with sintered segment.
Applications include: medium to hard clay bricks and pavers.

Product code	Barcode	Diameter (in)	Bore (mm)	RPM	Inner Qty	Outer Qty
OX-THB-12	9341231003042	12	25.4/20	5400	3	5
OX-THB-14	9341231003059	14	25.4/20	4300	5	10
OX-THB-16	9341231003066	16	25.4/20	3800	5	10

TRADE TCB 50 / 50 COMBINATION

The combination blade with sintered segment.
Applications include: 50/50 clay/concrete, clay bricks and pavers.

Product code	Barcode	Diameter (in)	Bore (mm)	RPM	Inner Qty	Outer Qty
OX-TCB-12	9341231003073	12	25.4/20	5400	2	5
OX-TCB-14	9341231003080	14	25.4/20	4300	5	10
OX-TCB-16	9341231003097	16	25.4/20	3800	5	10

TRADE TSB SOFT BRICK

The soft brick/block blade for abrasive materials. Sintered welded segment.
Applications include: concrete, pavers, besser blocks and sandstone.

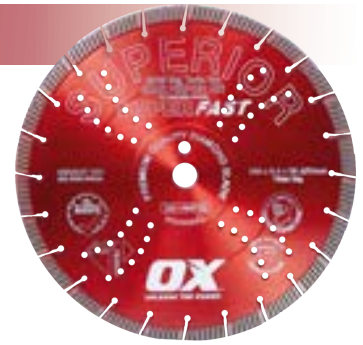

Product code	Barcode	Diameter (in)	Bore (mm)	RPM	Inner Qty	Outer Qty
OX-TSB-12	9341231003127	12	25.4/20	5400	3	5

Tuck Pointing/Mortar Raking Blades

Tuck pointing diamond blades provide fast, effective removal of mortar joints prior to re-pointing. With a segment width of 6mm, OX mortar rakes are designed to cope with removal of most joint widths.

A thicker centre plate maintains a stable and durable cut and protects against undercutting.

The market leading PMR is now also available in 7" (180mm) for use on 7" and 9" angle grinders, offering more powerful cutting and greater cutting depth. The PMR puts less strain on a 9" angle grinder and is safer and more manageable than using a 9" (230mm) diameter blade in 6mm segment width.

PRO PMR TUCK POINTING

High quality 6mm wide segment blade. The market leader – a great product to use. Fast cut/long life. Applications include: mortar raking, abrasive materials.

Product code	Barcode	Diameter (in)	Bore (mm)	RPM	Inner Qty	Outer Qty
OX-PMR-4	9341231031519	4	16	-	3	6

Diamond Core Drills

With a wealth of experience in all types of diamond core drilling, OX has the most complete range of products available in the market today.

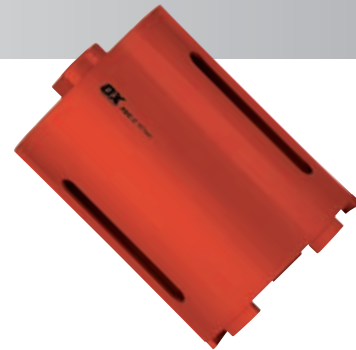

NO.1 FOR DRY CORE DRILLING

OX: the home of dry core drills.

INDUSTRY BENCHMARK

The most popular.

For drilling brick and block.

NO.1 FOR WET CORE DRILLING

The professional choice for the professional contractor. UWC wet concrete drills have been tested and proven in the most demanding aggregates in the world.

For drilling reinforced concrete.

NO.1 FOR TILE DRILLING

PDD Tile Drilling revolution. Quite simply, exactly what the market has been asking for. Fast, easy to use, and completely trouble free.

With the TTD cores for occasional users, and a choice of the PDD or UTDH cores for professional users – OX have the answers.

For drilling porcelain, granite, hard natural stones and ceramics.

NO.1 FOR CORE DRILLING KITS

The perfect start to dry core drilling, our aluminium cases are sturdier, smarter and contain more accessories than the competition. Often copied, but never surpassed, these are the cores to be seen with – and use.

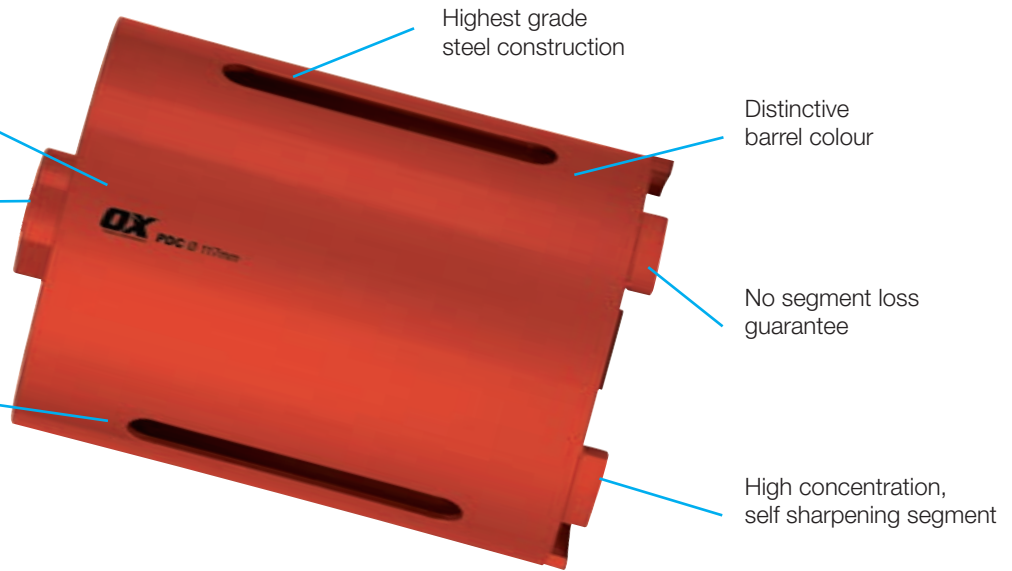

Dry Core Drills

Core diameter visually shown

Precision engineering

Slotted core design: efficient dust clearance and core removal

Rapid, clean cutting; long life.

Highest grade steel construction

Distinctive barrel colour

No segment loss guarantee

High concentration, self sharpening segment

PRO PDC DRY CORE DRILL

Universal dry diamond core drill in all popular plumbers sizes up to 127mm. Slotted barrel provides efficient dust clearance and ease of removing drilled core. For brick and blockwork. Applications include: medium and soft bricks, concrete blocks (lightweight and dense), abrasive concrete products. Occasional use in harder materials e.g. semi engineering bricks and clay products. Minimum drill size: 850W

Concreting Tools

Concreting is hard work and the OX range has been developed to stand the test of time.

Look at the detail of the products – the quality and thickness of the steel, the perfect amount of flexibility, the positioning of the handles, the quality of the riveting – the complete finish.

A tough range of trowels to cement your reputation.

PRO ADJUSTABLE FORMWORK BRACKET

FEATURES

- Bracket is adjustable to suit 35mm to 50mm timber
- Used for forming 150mm brickwork rebate on house floor slabs

Product code	Barcode	Suits	Inner Qty	Outer Qty
OX-P101950	9341231021336	35 - 50mm	6	12

PRO FIXED FORMWORK BRACKET - 50MM

FEATURES

- Bracket suits 50mm timber
- Used for forming 150mm brickwork rebate on house floor slabs

Product code	Barcode	Suits	Inner Qty	Outer Qty
OX-P103405	9341231024320	2" / 50mm	6	12

TRADE TIE WIRE REEL

FEATURES

- Fits any standard belt
- Suits all types of tie wire
- Left or right hand use
- Cast aluminium construction

Product code	Barcode	Suits	Inner Qty	Outer Qty
OX-T299701	9341231020230	Fits any standard belt	4	12

Suits OX Pro Leather Tool Belt

OX-T281307	9341231016660	1040mm	0	24

TRADE LIGHTWEIGHT EXTRUSION RAKE

FEATURES

- Lightweight for ease of use
- Extruded rake plate
- 45 degree edge angle
- 1500mm long handle with soft grip

Product code	Barcode	Size	Inner Qty	Outer Qty
OX-T016301	9341231024443	100 x 500mm	4	24

PRO ALUMINIUM CONCRETE RAKE

FEATURES

- 1500mm long handle with soft grip
- Braced for additional strength
- Aluminium construction - powder coated
- 45 degree edge angle

Product code	Barcode	Size	Inner Qty	Outer Qty
OX-P016302	9341231024450	100 x 500mm	4	48

PRO ALUMINIUM CONCRETE RAKE – WITH HOOK

FEATURES

- Braced for additional strength
- With 8mm diameter hook for lifting rebar
- 1500mm long handle with soft grip
- 45 degree edge angle
- Powder coated handle

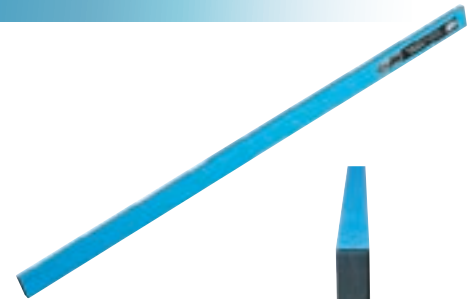

Product code	Barcode	Size	Inner Qty	Outer Qty
OX-P016303	9341231024467	100 x 500mm	4	48

PRO STRAIGHT EDGE

FEATURES

- High quality extruded aluminium
- Easy to clean powder-coated finish
- Fluted profile - easy to grip extrusion design

Bricklaying Tools

Bricklaying is a highly skilled trade and is characterised by regional variations in both brick size/shape & laying techniques.

We have spent 4 years 'Living the trade' with bricklayers & liaising with training institutions around the world to ensure our products are second to none.

From the strength of the forged steel to the perfect weight & balance – these tools symbolise quality. Guaranteed better than the rest!

Bricklaying Tools

PRO POINTING TROWEL

FEATURES

Plastering & Rendering Tools

No trades are as demanding on the design of its tools as the plastering & rendering trade.

Many tools look the same, but the OX Range has been tried and tested by tradesmen and offers unmatched quality.

OX tools do what you want them to do, over and over again.

A tough, durable design for the professional plasterer – you'll probably wear out before they do!

PRO SCORE & SNAP KNIFE

FEATURES

- The 4.0mm & 6.0mm nozzles are suitable for medium viscosity materials
- The 8.0mm nozzle is suitable for high viscosity materials
- The size of drop is controlled by means of the air regulator which can be fitted in the air inlet in the gun body
- The spray gun is an internal mix type with material gravity fed from the hopper
- This gun requires a minimum of an 8mm hose line
- Maximum hopper capacity is 5.5 litres - square or 3.5 litres - round
- Use with masonry, textured paints & textile wall coatings on medium sizes surfaces

TRADE TEXTURE GUN - REPLACEMENT KIT

PRO MixM8 MIXING PADDLES – HEX / M14

FEATURES

- **GUARANTEED** – Faster mix even using a cordless drill (min 18V)
- **GUARANTEED** – Less effort and smoother final mix
- Long life and easy clean
- Edge to edge mixing - no need to stop and stir
- 10mm Shaft version fits a standard chuck and can be used with a standard 18v cordless drill - no need for power on site when mixing
- Far less strenuous - no more chasing your mix around, just hold the MixM8 in the centre of the bucket and let the blades do the work

Product code	Barcode	Size	Inner Qty	Outer Qty
OX-P121910	5060359915443	10mm Hex	N/A	6
OX-P122014	5060359915450	14mm M14	N/A	6

INSTRUCTIONS FOR USE

- For best results: use a 25l plastering bucket
- It is essential that the water is put into the bucket before the powder (11.5 litres for a whole 25kg bag of multi-finish plaster).
- Empty the full bag or bags of plastering product into the bucket and allow the mix to settle into the water for a few seconds.
- Once the mixture has settled insert the mixm8 blade tool into the mix and fully immerse the tool in the centre of the bucket.
- Hold the tool vertically and once fully immersed apply the power slowly and once the vortex starts increase to full power.
- Hold the tool vertically in the centre of the bucket and allow the tool to do the work.
- You can lift the tool up and down but you do not have to chase the mix round the bucket as you would do with a conventional mixer.
- No need to stop and scrape the side of the bucket as the mix is pulled in and down, check your mix after 35-40 seconds as it may be ready to apply.
- To clean just run the blade in a bucket of clean water for 3-4 seconds, pull it out and you will have a perfectly clean blade.

Measuring Tools

Few tools are as widely used across the world as the tape measure.

We at OX recognise that and build our tapes to last the test of time. Durability, reliability and innovation are the words we think of when designing a new line of tapes.

OX has enhanced it's reputation as a leading tape rule manufacturer with the launch of the new Pro Series short tape, which boasts an impressive 3.0m stand out whilst remaining an extremely compact design.

PRO STAINLESS STEEL TAPE MEASURE

FEATURES

- Professional tape measure
- Stainless steel case with over mold for heavy duty use
- Extra tough nylon coated steel 30mm wide blade
- 3.0m stand out
- Large end hook
- Easy access thumb lock

Diamond Blade Troubleshooting Guide

<p>LOSS OF TENSION</p> 	<p>CAUSES</p> <p>Using the wrong blade on a specific material. A blade specifically designed and manufactured for cutting tiles will wear out extremely fast if used on highly-abrasive material such as block.</p> <p>Inadequate water is supplied to the blade.</p> <p>Bad spindle bearings, worm mounting arbor, or misaligned shaft.</p> <p>Loss of power, resulting from loose drive belts or improper voltage.</p>	<p>REMEDIES</p> <p>Avoid using general purpose specifications for cutting a single specific material. General purpose diamond blades are designed to cut a wide range of materials. Since it is unlikely an operator will be cutting an equal amount of both hard and soft materials at all times, this is not the most economical method of cutting.</p> <p>Make sure water hoses are clean and free from any blockages. Approximately nine litres of water per minute are required to properly cool a masonry saw blade. On concrete saws, 9-22 litres per minute are required.</p> <p>Replace defective parts.</p> <p>See machine manual for proper belt tightening, replace worn belts, make sure proper line voltage is being supplied to the motor.</p>
<p>BLADE WOBBLER</p> 	<p>Blade is too hard for material being cut.</p> <p>Blade has become dull as a result of being used on too hard a material.</p> <p>Blade does not cut material it was specified for.</p> <p>Insufficient power, not allowing blade to cut properly. Often, the blade will stall in the cut.</p>	<p>Select the proper blade specification for the material being cut. Consult blade recommendation chart.</p> <p>Dress or sharpen with mortar droppings or by cutting a lightweight abrasive building block to expose diamonds. If continual dressing is required, the blade specification is too hard for the material being cut.</p> <p>First, make sure the blade is correct according to the blade recommendation chart. If the blade is correct, allow it to dress itself on the material to be cut. If it does not dress itself, sharpen it as you would a dull blade, according to the procedure described above.</p> <p>Tighten belts in accordance with machine maintenance instructions. Use correct voltage at motor and adequate horsepower for cutting application.</p>

Diamond Blade Troubleshooting Guide

SEGMENT LOSS

CAUSES

On masonry saws, the material is not held firmly, which causes the blade to twist or jam in the cut and loosen the segment.

Overheating is due to inadequate supply of water or complete loss of water. This is usually accompanied by discolourations which appear on the steel centre near the area of segment loss.

Steel centre is worn thin as a result of undercutting by abrasive fines generated during cutting. The steel centre (blank) wears to a knife edge, weakens and causes a segment to be separated.

Defective blade collars cause the blade to flutter in the cut or fail to adequately support the blade in perfect alignment.

Blade is too hard for material being cut, causing excessive dullness and segment separation due to impact or fatigue. This can also cause frictional heat that can melt the braze when insufficient water is supplied to the blade.

Blade is cutting out of round resulting in a pounding impact.

Improper blade tension causes high pressure on the segments and subsequent failure of the brazed joint.

REMEDIES

Hold the material firmly against the backstop.

Provide adequate water flow to both sides of the blade. Look for line blockages. On concrete saws, temporary complete loss of water can result from equipment running over the water feed hoses.

Use sufficient water to flush fines out of the cut.

If generated fine s are highly abrasive, blades with undercut protection.

Clean foreign material from the blade clamping disc surfaces, ore replace clamping discs if they are under manufacturer's recommended diameter.

Use the proper blade specifications for the material being cut.

Replace worn bearing, realign blade shaft, or replace worn spindle.

Make sure the running speed of equipment is specified when ordering blades. On concrete saws, the spindle speed should be checked with a tachometer to ensure that each diameter blade is running at the recommended cutting speed and blade-tensioned speed.

DISTORTED CENTRE STEEL

Inadequate tightening of the blade on concrete saw mounting shaft. This causes drive pin to force its way through blade blank.

Dropping saw head with mounted blade particularly on concrete saws. Also dropping objects on unmounted blade distorts blade blanks.

Tighten clamping nut securely.

Avoid dropping the blade. Protect blade from abuse and handle with care.

Diamond Blade Troubleshooting Guide

UNEVEN SEGMENT 	CAUSES	REMEDIES
CRACKS IN SEGMENTS 	<p>The blade is too hard for the material being cut.</p>	<p>Use blade with a softer bond.</p>
CRACKS IN STEEL CENTER 	<p>Blade flutters in a cut as a result</p> <p>Blade specification is too hard for material being cut.</p> <p>Forcing blade in operation.</p> <p>Twisting blade in cut.</p>	<p>Tighten the blade clamping disc nut. Be sure that the blade is running at the properly tensioned speed and that the drive pin is functioning properly.</p> <p>Use softer blade bond to eliminate stresses which create cracks.</p> <p>Allow blade to cut freely without bouncing.</p> <p>Ensure blade is kept in straight line do not force around corners.</p>

Diamond Blade Troubleshooting Guide

SHORT LIFE 	CAUSES	REMEDIES
BLADE WILL NOT CUT 	<p>Using the wrong blade on a specific material. A blade specifically designed and manufactured for cutting tiles will wear out extremely fast if used on highly-abrasive material such as block.</p> <p>Inadequate water is supplied to the blade.</p> <p>Bad spindle bearings, worm mounting arbor, or misaligned shaft.</p> <p>Loss of power, resulting from loose drive belts or improper voltage.</p> <p>Blade is too hard for material being cut.</p> <p>Blade has become dull as a result of being used on too hard a material.</p> <p>Blade does not cut material it was specified for.</p> <p>Insufficient power, not allowing blade to cut properly. Often, the blade will stall in the cut.</p>	<p>Avoid using general purpose specifications for cutting a single specific material. General purpose diamond blades are designed to cut a wide range of materials. Since it is unlikely an operator will be cutting an equal amount of both hard and soft materials at all times, this is not the most economical method of cutting.</p> <p>Make sure water hoses are clean and free from any blockages. Approximately nine litres of water per minute are required to properly cool a masonry saw blade. On concrete saws, 9-22 litres per minute are required.</p> <p>Replace defective parts.</p> <p>See machine manual for proper belt tightening, replace worn belts, make sure proper line voltage is being supplied to the motor.</p> <p>Select the proper blade specification for the material being cut. Consult blade recommendation chart.</p> <p>Dress or sharpen with mortar droppings or by cutting a lightweight abrasive building block to expose diamonds. If continual dressing is required, the blade specification is too hard for the material being cut.</p> <p>First, make sure the blade is correct according to the blade recommendation chart. If the blade is correct, allow it to dress itself on the material to be cut. If it does not dress itself, sharpen it as you would a dull blade, according to the procedure described above.</p> <p>Tighten belts in accordance with machine maintenance instructions. Use correct voltage at motor and adequate horsepower for cutting application.</p>

Diamond Blade Troubleshooting Guide

BLADE BORE OUT-OF-ROUND	CAUSES	REMEDIES
 UNDERCUTTING STEEL CENTRE	<p>Abrading or wearing away of the steel centre faster than the diamond segment is due to highly abrasive fines generated during cutting.</p>	<p>Use as much water as possible to flush out fines generated during cutting or use blades with undercut protection. NOTE: Blades with undercut protection are not always the final answer to eliminating undercutting. Are must still be taken to provide sufficient water to the steel centre are immediately adjacent to the segment. This is especially important when making deep cuts.</p>
 BLADE WORN OUT-OF-ROUND	<p>Shaft bearings on masonry or concrete saws are worn, causing the blade to run eccentrically and wear out-of-round.</p> <p>Engine is not properly tuned on concrete saws, causing surges in blade rotation.</p> <p>Blade spindle hole is damaged from previous mis-mounting.</p> <p>Blade mounting spindle is worn. A groove may have been scoured on the mounting spindle as a result of previous blades spinning on the arbor. When a new blade is placed on such a worn spindle, it seats improperly and runs eccentrically.</p> <p>Blade slips on arbor shaft.</p> <p>Bond is too hard for material causing machine to 'pound' at regular intervals, wearing one half of the blade more that the other half.</p>	<p>Install new blade shaft bearings or blade shaft, as required.</p> <p>Tune engine according to saw manufacturer's manual.</p> <p>For large diameter blades it may be possible to rebraze segments to a new centre.</p> <p>Replace worn shaft or spindle bushing.</p> <p>On a masonry saw, tighten the blade collar. On a concrete saw, make certain that the drive pin is functioning.</p> <p>Use proper blade specification.</p>

FAQ's

Answers

- Can I get a product on an urgent airbag? Yes we can freight product in an airbag overnight. There will be a \$25 fee and the order needs to be booked before 10.30am AEST and be within 5kg weight and 40cm.
- Can I pick up my order from the warehouse?..... Orders can be picked up from the warehouse. There will be a \$25 fee and an order reference number must be obtained from Customer Service before collection. 2 hours notice must be given.
- Can I place an order without an account?..... An account application must be completed and approved as a qualified distributor before placing orders.
- How do I apply for an account..... Email the Customer Service Team at sales@oxgroup.com.au for an account application form.
- How long will it take for my account to be opened? Once application has been submitted, applicant will be contacted within 5 business days in view of account being opened within 10 business days.
- Do you provide your pricelist in an excel version? Yes. Please contact customer service at sales@oxgroup.com.au to receive a copy.
- Do you accept Amex? Mastercard & Visa are our accepted credit card methods.
- Is there a surcharge if I pay via credit card? Credit card payments incur a 3% surcharge.
- Do you have a minimum order value? \$50 is minimum order value.
- Do you offer same day dispatch? All orders placed by 12:00pm AEST will be dispatched the same day
- Does OX sell to the public..... OX only sells to authorised resellers, these distributors can be located via our website.
- How long has the OX brand been around? Our tool range was born in 1974 in Perth, Australia and was launched under the OX brand at the beginning of 2010.
- What are the pack qtys?..... All pack quantities are listed in this catalogue.
- What category do you specialise in?..... OX Group has 44 years of experience in the wet trade tool market, diamond tool market and offers a range in multiple categories in the construction industry.
- What is my reps mobile number?..... Please call 02 8845 6600 for your reps mobile number.
- What is our minimum order value for FIS?..... \$350 Net
- What is the freight charge under FIS? \$19.95. This excludes access product. Contact our Customer Service Team for a price for freight costs on our access range.
- What is your returns policy?..... At OX, we have a sale or return policy. If you cannot sell an OX brand product within 3 months of purchase, simply return it in a suitable/ saleable condition for a full refund.
- How long will it take to freight? See below graph of freight transit times*.

Destination	Days truck leaves SYD	Lead time	Destination	Days truck leaves SYD	Lead time

Terms and Conditions

1. INTERPRETATION

- (a) 'Contract' means the standard trading terms and conditions of sale (which applies to each and every Quotation and/or Order) and includes any Quotation and Order
- (b) 'OX Group' means
- (c) 'Customer' means the entity to which 'OX Group' enters into a Contract for the sale of Goods.
- (d) 'Goods' means the goods described in the Quotation or Order and includes replacement goods.
- (e) 'Order' means a written or verbal order from the Customer to OX Group.
- (f) 'Quotation' means a written or verbal quotation provided by OX Group to the Customer.

2. ORDERS

- (a) Orders for Goods will be binding upon OX Group and the Customer. However, OX Group reserves the right to accept orders in whole or in part.
- (b) Once OX Group has accepted an Order, the customer may not alter or modify the Order without the prior written consent of OX Group.
- (c) 15% Re-stocking fee applies to all returned products providing they are in re-saleable condition.

3. PRICES

- (a) All prices contained in the Quotation and/or Order will be exclusive of GST. All prices are in Australian dollars and subject to alteration without notice. All invoices are in Australian dollars and must be settled in Australian dollars.
- (b) Any order placed with a value of under \$50.00 excluding GST will not be processed. This minimum invoice value does not apply to back-orders.
- (c) Handling fee of \$19.95 will be applied to the total of every invoice, excluding back-orders
- (d) Orders with an invoice value of over \$350.00 excluding GST will be shipped free in-store
- (e) Orders with an invoice value of under \$350.00 excluding GST will be charged a freight charge of \$19.95 (Freight charges subject to change)

4. PAYMENT AND CREDIT TERMS

- (a) Unless otherwise agreed in writing, the payment due date is strictly thirty, (30) days from the end of the month in which the Goods are purchased.
- (b) Accounts with overdue balances will automatically have credit withdrawn until all outstanding balances are cleared. OX Group reserves the right to charge interest at the rate of 2% on all overdue balances calculated on a daily basis from the due date until such amount is paid.
- (c) If the Customer defaults in payment of any invoice when due, the Customer will indemnify OX Group from and against all OX Group's costs and disbursements including a solicitor and own client basis and in addition to OX Group's nominee's costs of collection.

5. DELIVERY OF GOODS AND RISK

- (a) Delivery of the Goods shall be made to the Customer's address. The Customer shall make all arrangements necessary to take delivery of the Goods whenever they are tendered for delivery.
- (b) The failure of OX Group to deliver will not entitle the Customer to treat this Contract as cancelled.
- (c) OX Group will not be liable for any loss or damage whatever due to failure by OX Group to deliver the Goods (or any part of them) promptly or at all.
- (d) All risk for the Goods passes to the Customer on delivery even if OX Group retains ownership.
- (e) Delivery will be free in store (FIS) Australia wide for Orders in excess of \$350.00 + GST. However, the Customer will be liable delivery charges if a delivery date is required outside of usual delivery times. Orders less than \$350.00 + GST will be subject to the current freight charge of \$19.95 (Freight charges subject to change)

6. RETENTION OF TITLE

- (a) All Goods remain the property of OX Group until the Customer has paid for the Goods in full. If payment is made by cheque, payment will not be deemed to have been made until the cheque has been honoured.
- (b) If the Goods are on-sold by the Customer before payment to OX Group, the proceeds of sale will become

property of OX Group.

- (c) If the Goods are not paid for pursuant to clause 4, OX Group may give notice in writing to the Customer to return the Goods or any part of them to OX Group.
- (d) OX Group may enter the Customer's premises without notice at any time and take possession of the Goods and without being responsible for any damage thereby caused if:
 - (i) The Customer does not pay for the Goods under clause 4;
 - (ii) The Customer fails to return the Goods upon demand;
 - (iii) A trustee in bankruptcy, Administrator, or receiver and manager is appointed over the Customer;
 - (iv) Winding-up proceedings in relation to the Customer are commencing; or
 - (v) The Customer becomes bankrupt.

7. CLAIMS

- (a) The Customer will inspect the Goods on delivery and will within seven (7) days of delivery notify OX Group in writing of any alleged defect, shortage in quantity, errors, omissions or failure to comply with the Order or Quotation.
- (b) The Customer will afford OX Group the opportunity to inspect the Goods within a reasonable time of delivery if the Customer believed the Goods are defective in any way. If the Customer fails to comply with these provisions, the Goods will be deemed to be free from any defect or damage and payment will be owing under this Contract.
- (c) If OX Group agrees in writing that the Customer is entitled to reject the Goods because they are defective:
 - (i) The Goods must have a corresponding invoice number quoted;
 - (ii) Freight charges incurred for the return of the Goods being returned is at the expense of the Customer, unless otherwise agreed; and
 - (iii) OX Group's liability is limited to either replacing or repairing the Goods at its discretion.
- (d) OX Group does not warrant that the Goods are fit for any particular purpose or an intended use by the Customer.

8. LIMITATION OF LIABILITY

- (a) Subject to clause 8(b), OX Group will have no liability whatsoever for any direct or indirect losses, expenses, damages and costs incurred by the Customer caused by any breach by OX Group of this Contract or any negligent act or omission.
- (b) The liability of OX Group to the Customer in the event of any breach of this Contract or other cause of action will not exceed the prices of the Goods.

9. PRIVACY ACT 1998

- (a) The Customer agrees for OX Group to obtain from a credit-reporting agency and the trade referees a credit report containing personal credit information about the Customer and any additional information required by OX Group.
- (b) OX Group may exchange information about the Customer with those trade referees name in the application form for a trading account or named in a consumer credit report issued by reporting agency to:
 - (i) Assess the Customer's application;
 - (ii) Notify other credit providers of a default by the Customer;
 - (iii) Exchange other information with other credit providers as to the status of the trading account, if the Customer is in default with other credit providers; and
 - (iv) Assess the credit worthiness of the Customer.

10. GENERAL

- (a) If any provision of these terms and conditions becomes void or unenforceable, it will be severed from this agreement without affecting the enforceability of the other provision, which will continue to have full force and effect.
- (b) These terms and conditions are governed by the laws of New South Wales and each party irrevocably and unconditionally submit to the nonexclusive jurisdiction of the courts of New South Wales.
- (c) OX Group may terminate or vary this Contract or cancel delivery of Goods at any time before the Goods are

delivered by giving written notice. OX Group will not be liable for any loss or damage whatever arising from termination or cancellations.

- (d) The Customer acknowledges and agrees that the products sold to the Customer by OX Group cannot be offered for sale through third party shopping websites or platforms (including but not limited to Amazon and Gumtree) without the express written authorisation of OX Group.

11. PERSONAL PROPERTY SECURITY ACT (PPSA)

11.1 The Customer agrees, at the request of OX Group, to enter into a Security Agreement with OX Group to grant in favour of OX Group a Security Interest in all the Customer's present and after acquired property relating to the Goods.

11.2 The Customer acknowledges and agrees that it shall, within 14 days of request from OX Group, do all things and sign all documents as required by OX Group to register, confirm or validate the Security Interest created over the Customer's assets by any Security Agreement.

11.3 OX Group may exercise its rights under the Security Agreement any time after the Customer fails to comply with this Agreement, without OX Group first having to take any action or enforce any of its other rights against the Customer.

11.4 The Customer will be entitled to a release of the Security Agreement when all its obligations under this Agreement have been satisfied.

11.5 The Customer shall not without OX Group's prior written consent, which will not be unreasonably withheld, do any of the following:

- (a) acquire any asset which is, or upon acquisition, will be subject to a Security Interest which is not a Permitted Security Interest; or
- (b) give any person other than OX Group control or possession of the Goods (other than under a Permitted Security Interest).

11.6 The Customer agrees that it will promptly take such action as OX Group may require (including providing information or signing documents) to ensure that any Security interest granted in favour of OX Group attaches to the secured property and to enable OX Group to perfect any such Security Interest or otherwise exercise any rights that it may have under the PPSA Law in relation to the secured property.

11.7 The Customer acknowledges and agrees that, from the registration commencement time under the PPSA:

- (a) it shall not cause or permit any person to take a Security Interest over, or to register a financing statement in relation to, any secured property without the prior written consent of OX Group and will immediately notify OX Group if it becomes aware of any person taking steps to register a financing statement in relation to such secured property;
- (b) it has no rights under, or by reference to, sections 125, 142 and 143 of the PPSA if it defaults and OX Group takes enforcement action under this Agreement in respect of the secured property;
- (c) it waives its rights to:
 - (i) receive any notice under sections 95, 130 and 135 of the PPSA in relation to the enforcement of any Security Interest over the secured property;
 - (ii) receive a statement of account under section 132(3) (and 132(4) of the PPSA if OX Group disposes of any of the secured property following repossession of that secured property; and
 - (iii) receive a copy of, or notice of, any verification statement confirming registration of a financing statement or a financing change statement relating to any Security Interest under, or provided for by, this Agreement.

11.8 Except if section 275(7) of the PPSA applies, each party to this Agreement agrees not to disclose any information of the kind referred to in section 275(1) of the PPSA that is not publicly available.

Warranty

OX Group International Pty Ltd (OX Group) warrants that all products supplied by it and purchased by you from Authorised OX Group Dealers throughout Australia are free of defects except for those products listed under Warranty Exclusions.

Warranty Claims

If you consider that any product supplied by OX Group is defective, you can lodge a claim under this Warranty and any apparent fault will be rectified free of charge by OX Group or an OX Group Authorised Service Dealer within the Warranty Period, which is effective from the date of purchase provided that you meet the following conditions;

- You must produce the original invoice/receipt or other proof of purchase document disclosing the purchase date.
- All costs of installation, cartage, freight, travelling expenses, hiring tools and insurance are paid by the customer.
- The product, being precision equipment, has not been misused, adjusted or serviced by any person other than an OX Group Authorised Service Dealer.
- The equipment has been installed correctly and is used in accordance with the OX Group instructions supplied with the product.

OX Group provides this warranty in addition to all other rights and remedies that you may have under law in relation to the products to which this warranty relates.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Notwithstanding the preceding clause, OX Group's liability in respect of a breach of a consumer guarantee or any warranty made under these Conditions of Warranty for any products not of a kind ordinarily acquired for personal, domestic or household use is limited, to the extent permissible by law and at the option of OX Group to:

1. Replacing the products or the supply of equivalent products;
2. The repair of the products;
3. The payment of the cost of replacing the products or of acquiring equivalent products; or
4. The payment of the cost of having the products repaired.

To the extent permitted by law, all other warranties whether implied or otherwise, not set out in these Conditions of Warranty are excluded and OX Group is not liable in contract, tort (including, without limitation, negligence or breach of statutory duty) or otherwise to compensate the customer for:

1. Any increased cost or expenses;
2. Any loss of profit, revenue, business, contracts or anticipated savings;
3. Any loss or expense resulting from a claim by a third party; or
4. Any special, indirect or consequential loss or damage of any nature whatsoever.

If you wish to make a claim under this Warranty, you should:

- Contact Ph: +612 8845 6600;
- Visit your nearest Authorised OX Group Dealer;
- Visit OX Group website for details: www.oxtools.com

These conditions may only be varied with the written approval of the directors of OX Group International.

Warranty Period

Product Type	Warranty Period
Diamond Tools	12 Months
Hand Tools	12 Months
Access Equipment	12 Months
Safety Equipment	12 Months
Construction Machinery	12 Months

Warranty Exclusions

This section identifies what is excluded under this Warranty.

This Warranty does not cover damage caused by:

- Misusing, overloading or abusing the OX product,
- Operating the product in a manner that is not in accordance with the OX Group instructions supplied with the product (the "Instruction Manual"),
- Failing to clean the product in accordance with the instructions for correct and regular cleaning as set out in the Instruction Manual,
- Not carrying out periodic maintenance,
- Neglecting or otherwise failing to maintain the product in accordance with the instructions for maintenance of the product including regular tune-ups, lubrication etc....,
- Using incorrect voltage or non-authorised electrical connections with the product,
- Installing the product incorrectly,

- Using non authorised/non-standard parts, non-genuine OX Group parts in connection with the product,
- Repairing or carrying out any work on the product by someone other than an Authorised OX Group Service Dealer,
- Causing a double burnout - field and armature burnout,
- Operating the product with any guard, shield or line cutting knife removed, repositioned, or that is incomplete or damaged,
- Using or operating the product with any evidence of partial failure of product or damage being present,
- Tampering with the product in any way other than in accordance with the manual,
- Not having taken reasonable steps to prevent the damage or failure from occurring to the product,
- Storing the product inconsistently with manufacturer's recommendations or where the product is exposed to corrosive substances such as fertilisers, grass and plant residue including palm tree sap, bore water and other detrimental environmental exposure,
- Making mechanical adjustments that are inconsistent with the Manual- including, chains, bars, engine tuning etc....,
- Operating the product with incorrect fuel to oil ratio,
- Having made improper adjustments of ignition timing or the carburettor,
- Using the product with clogged or removed filters (i.e. fuel filter, oil filter, air filter),
- Using incorrect chain and bar oil/lubricant for the oil pump

In addition to the above, this Warranty DOES NOT cover the following:

- Products purchased:
 - Outside of Australia,
 - from a non - Authorised OX Group Dealer (such as purchases from unauthorised retailers and purchases over the internet, from local/ international sellers or sites such as Ebay),
 - at an auction, or
 - from a private seller.
- Accidental damage or damage caused by an extra ordinary event or circumstance beyond your or anyone else's control including damage caused by:
 - environmental factors,
 - natural discolouration of material due to ultraviolet light,
 - crushing, impact with hard surface or damage caused in the transit of the product, foreign material, or exposure of the product to excessive heat or cold or to solvents, or water entry into the product,
 - abnormal product performance caused by any ancillary equipment interference or other external factors,
- Damage or failure that occurs for a reason or reasons that were already disclosed to you (in writing or otherwise), prior to your purchase of the product,
- Damage or defects to the product that ought reasonably to have been revealed to you by an examination of the product, where you conducted such an examination before acquiring the product,
- Normal wear and tear due to the course of normal use,
- Freight costs associated transporting the product between you, the place of purchase, the Authorised OX Group Dealer and OX Group for the purposes of making a claim pursuant to this Warranty or otherwise,
- Repairs that are required by you to be made to the product which are simply due to a clogged or restricted exhaust system, carbon deposits in exhaust ports, piston crown or combustion chamber or periodic decarbonising,
- Products with serial number altered or removed,
- Refurbished, ex display or factory second products,
- Consumable items supplied with the product or that are a part of the product,
- Service parts,
- Accessories, that for the avoidance of doubt include but are not limited to the following: those included with the product at the time the product was purchased by you including cases & site bags, brushes, chucks, cord sets, bulbs, LED's & lamps, driver & drill bits, blades, driver blades, o - rings, switches & triggers, power tool attachments, blades and cutters, spark plugs, carburettor kits, filters, bars & chains, cutting equipment, recoil springs, rope, belts, measuring devices, air (pneumatic) fittings, nose caps, gaskets, fuel hoses,
- The product coming into contact with sand, water, rust, corrosion, fire, vermin and insect infestation, power outages or surges or inadequate voltage or current.

If the product you are using has been rented or leased by you, and you consider a claim might be made under this Warranty, you should refer the matter to the rental or leasing company immediately and they will handle the matter.

This Warranty does not cover service costs in replacing and maintaining consumable parts and accessories that have ceased working through normal wear and tear such as, but not limited to: drill heads, blades, cutters and other parts classifiable as a consumable part or accessory.

Safety

Safety is not something that is taken lightly at OX. When we design and build our tools the safety of the operator and safety of the tool is always the most important factor that is well thought-out during the whole process.

Safety when using OX tools is of paramount importance. Ultimately safety comes down to the operator which is why instructions need to be read and adhered to. It is also important to ensure the correct safety clothing is worn whilst working on a construction site.

Environmental

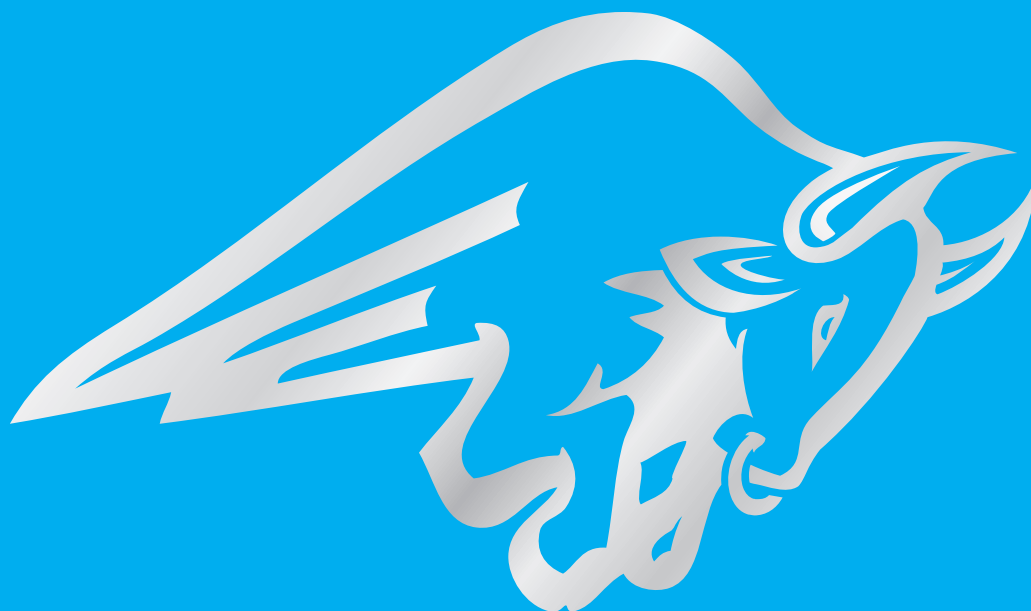

OX Group is committed to managing environmental impact as an integral part of our operations. In particular, it is our policy to assure the environmental integrity of our processes and facilities at all times. We will do so by adhering to the following principles:

We employ management systems and procedures specifically designed to minimise the use of hazardous materials, energy and other natural resources, to minimise the generation of waste and to enable recycling and reuse of materials.

We continually seek opportunities to improve our environmental performance by establishing objectives and targets, measuring progress, and reporting our results; including but not limited to energy, water, paper and fuel consumption and vehicle miles travelled.

We promote participation and communicate our commitment to responsible environmental management by promoting environmental responsibility among our employees; by providing the necessary training and support to enable them to implement this policy; by informing suppliers of our environmental policy and encouraging them to adopt effective environmental management practices; and by soliciting input from our employees, suppliers, customers and board members in meeting our environmental goals.
